## PROPOSAL INFORMATION

Please give a brief summary of request (500 Character Maximum):	
Population served through grant request:	Geographic area served through grant request:

E. What is the current use of the Facility or Location the funding is being requested for?

- Fire Station  
 Police Station  
 City Hall  
 Other Government Owned Building – Please Specify \_\_\_\_\_  
 Non Government Owned Community Center – Please Specify Ownership \_\_\_\_\_  
 Other – Please Specify \_\_\_\_\_

F. What is the address or location of the site?

--

G. Funds are being requested for (check one):

- Purchase of a Generator Only
- Wiring a facility or location to accept a generator – New Facility/Location
- Wiring a facility or location to accept a generator – Existing Facility/Location
- Purchase of Generator and associated installation costs – New Facility
- Purchase of Generator and associated installation costs – Existing Facility
- Other – Please Specify (Include an additional page giving a full rationale for why this project should be considered a priority, how it will prevent or limit disaster impacts and how this resource will be made available to other agencies within the County if applicable.)

H. Anticipated Project Start Date: \_\_\_\_\_

I. Estimated Completion Date: \_\_\_\_\_

J. BUDGET

Dollar amount requested:	\$ _____
Total project budget:	\$ _____

Emergency Management Mitigation Grant Program Funds, require a 50% Community Match with a cap of \$100,000 EMA share.

K. Please briefly describe the source of the Community Match funds for the project. (250 Character Maximum)

First Priority will be given to generators that will be incorporated into new construction. The Commission feels that this is the best time to incorporate emergency generators into buildings and the most cost efficient. Priority will also be given to government buildings that may be used for sheltering citizens during and after a disaster. These buildings shall have a written agreement for sheltering with the Clinton County Emergency Management Agency before the installation of the generator or generator related equipment. (It is also allowable for an entity who wishes to upgrade wiring and install switch gear so that a building can accept a generator in lieu of purchasing a generator to apply for funding.) Additional consideration will also be given to critical government facilities (e.g. Fire Stations, City Halls, Public Works, and Police Departments) that are currently without emergency power. Non Government buildings may also apply for Grant funding. The Grant Program is intended for purchasing generators for the local community, however, it is possible that other local mitigation needs that are not being addressed or funded through other sources may qualify. If you are applying for funds for a non-generator mitigation project, the Commission may have different requirements and ask for different documentation as it sees necessary.

**All projects funded through the Grant Program must be located within the borders of Clinton County.**
